ZQ | zamit® Quotient
The quotient that matters

Maximise your child's potential with ZQ

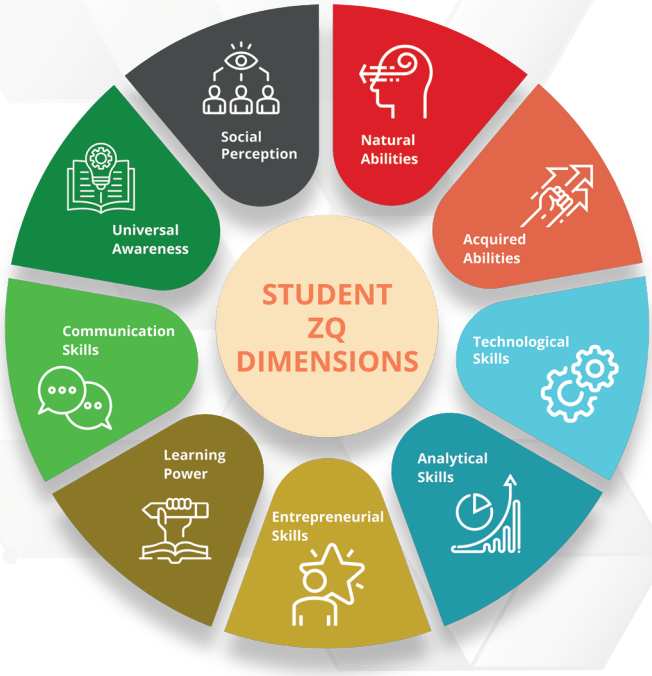
The Zamit Quotient (ZQ) is the world's first AI-driven, measurable future readiness indexing system that analyses and guides individuals towards success in the 21st century and beyond. It is the world's first score that indicates how far above or how far below the required standard a student, teacher and school stands in future readiness.

ZQ measurement and analysis

- It is an online, age-appropriate, scenario and multiple-choice task-based analysis for school students aged 8 years and above.
- It uses a technology-driven application based on Zamit's proprietary Machine Learning (ML) model, which is personalised and adaptive.
- It covers over 70 skills required for future success clubbed into Zamit's research-based nine dimensions.
- It provides a detailed and personalised report (over 35 pages long), guidance for improvement and an international ZQ score.
- It offers engaging activities, competitions, championships, courses and improvement resources, such as blogs, articles, videos, podcasts, webinars, workshops and the GETS International English Certification to help improve the students' ZQ scores.
- The process can be completed in one sitting or at the student's convenience. Once the student begins the process, we recommend they complete the analysis within 30 days.
- The ZQ measurement and analysis can be taken on a computer/laptop or through the Zamit Mobile App on a tablet or mobile phone.
- It is mapped to future-readiness skills as recommended in the NEP 2020 and learning skills covered in the International Baccalaureate (IB).
- It offers students optional opportunities for interactions with Zamit facilitators to discuss their personalised reports and improvement plans.

Zamit Nine Dimensions for students

Zamit's Nine Dimensions for students is the result of international research conducted by Zamit and QAI, a UK-based certificating and assessment body that focuses on future readiness, teacher training and English language certification. The Nine Dimensions of future readiness cover over 70 skills and help students analyse, improve and monitor these skills. By doing so, Zamit enables them to succeed in the 21st century and beyond.



The ZQ report for students provides

- overall ZQ scores across Zamit's Nine Dimensions, covering 70+ skills;
- the analysis of each of the Zamit's Nine Dimensions and ZQ scores;
- tips for improvement of the ZQ score;
- a comparative analysis across the city, state and country;
- guided improvement advice and support;
- continuous, real-time progress monitoring.

zamit®
Let's begin...

Zamit is a UK-based provider of measurement, improvement and monitoring solutions for future readiness and a trusted expert for all educational needs. Zamit and its academic partner, QAI, UK, created the world's first research-based and AI-driven, future-readiness benchmark index called Zamit Quotient (ZQ), which is considered the world standard for measuring future readiness.

At Zamit, we believe that in the 21st century, every student has the potential to succeed. We also believe that a student's academic abilities are not the only factor that determines their success. Instead, after providing them with an accurate, real-time analysis of their academic and non-academic skills and traits, we give them personalised recommendations for improvement and continuously monitor their development whilst helping them to achieve their goals.

Zamit, in association with its Corporate Social Responsibility partner, The Future Foundation (a not-for-profit body), provides scholarships to students who come from low-income households but have the potential to excel.
